📚 Library Management System

A Python console-based project created by **Manas**, **Piyush**, and **Smit** as part of the Toolkit for Research coursework.

This system allows users to **add, view, search, delete, and save books**. It demonstrates modular programming, file handling, and GitHub collaboration between three developers.

👥 Team Members & File Responsibilities

Member	Files
Manas	main.py, utils.py
Piyush	book_operations.py, manage_books.py
Smit	helpers.py, storage.py
